

Learning 2.0:

A Colorado Conversation

February 23, 2008

**Education is conversation.
Conversation creates change.**

The future of education does not exist in the isolated world of theory and abstract conference sessions. Instead, it exists in conversations. It exists in creating a robust learning network that is ever-expanding and just-in-time. Learning 2.0 is not the beginning of this conversation. It is merely a stopping point, a time to talk about the visible difference that we all seek. Essentially, Learning 2.0: A Colorado Conversation, is a one day conference/meetup for teachers, administrators, students, school board members, parents and anyone who is interested in education.
